

MAXIMUM EFFICIENCY

This water conditioning system is designed to maximize efficiency and minimize water and salt used for regeneration. Simple programming ensures your system will operate consistently and dependably for many years. Using as little as 4 pounds of salt per regeneration cycle the 5600 system effectively provides the homeowner quality water at a reasonable cost.

FEATURES

CHOICE OF 5600 TIMED OR 5600 METERED ALLOWS YOU COMPLETE CONTROL OF YOUR CONDITIONING NEEDS.

NON-CORROSIVE NORYL® PLASTIC CONTROL VALVE.

5600 TMR
TIMED CONTROLLED REGENERATION.

5600 MTR
METERED ON DEMAND REGENERATION WITH MANUAL OVERRIDE.

HEAVY-DUTY MECHANICAL CONTROL. OVER 20 YEARS PROVEN TRACK RECORD.

USES NON-CORRODING POLYGLASS RESIN TANK.

The 5600 with timer controlled regeneration gives you the ability to have the system regenerate automatically on a schedule that you select.

The 5600 with meter measures water usage providing on demand regeneration. This saves water and salt used for regeneration.

Tank shrouds are available in three colors to enhance overall appearance while minimizing tank condensation.

BENEFITS OF USING SOFTWATER

Hardness is the term used to describe the amount of calcium and magnesium in your water supply. These two minerals are the major cause of scale buildup that can damage water-using appliances, clog plumbing, and make water heaters less efficient and more costly to operate.

Hard water also prevents soap from lathering, wasting soap and other detergents. This creates soap scum leaving spots and streaks on dishes, and clothes looking dull and dingy.

The water conditioning system described in this literature will eliminate your hard water problems. It will efficiently remove the calcium and magnesium from your water supply by filtering it through a resin media. Salt is used to revitalize the system periodically to ensure constant soft water for your daily needs.

The *Water Wizard Conditioning System* is designed and engineered to give you reliable operation and conserve the water and salt required in the regeneration process.

BENEFITS OF A WATER WIZARD SYSTEM

- Use less soaps and other detergents saving you money.
- Makes your laundry feel softer and look brighter.
- Leaves your dishes clean and sparkling.
- Eliminates scale build up in pipes, faucets and water heaters.
- Makes hair more manageable and look shinier.
- Leaves your skin feeling naturally smooth and fresher.
- 17 to 21% less energy to heat soft water.
- Can use salt or potassium chloride for regeneration.
- System custom sized for your specific needs.

Take a close look at all of the advantages shown here and you'll find that conditioned water will make a noticeable difference in your life, and will save you money now and for many years to come.
